Dear Ebony,

Recently, Buhi Supply Co. released Buhi Renew Bags, its eco-friendly line of backpacks and backpack/messenger bag crossovers that can be taken anywhere.

Buhi Renew bags have been crafted with the revolutionary new burlap/bamboo fabric created by Buhi product engineers to be 90% biodegradable. They can be taken from the office to the outdoors.

There are three backpacks and two messenger bags to choose from.

Based on your focus on sustainability, I believe Buhi Renew is something that your readers would be interested in knowing about. These environmentally friendly bags offer sustainability without sacrificing durability, functionality and style. They're not only mostly biodegradable with burlap/bamboo fabric, but they appeal to the active traveler as well.

They include water-repellent properties, they're lightweight, which makes it easier to bring them along. They're bags that your readers can use to get in touch with the outdoors.

Buhi Renew bags embody sustainability, supporting the Earth, and eco-friendly properties. Consumers are calling for eco-friendly products, and Buhi is responding.

I will contact you via email next Wednesday, but if you have any questions or want to know more information about Buhi Renew, please feel free to email me before then.

Sincerely,

Chris Daigle
